HyperPerfect

Full Agentic AI Workflows for Excel

5 new features. One major update.

Plan Mode

Custom Prompts

Reference Files

Custom Agents

Plan Mode

Start a strategic planning session with your AI. It maps out the task, builds the tools, and executes. Everything gets recorded and organized right in Excel.

Custom Prompts & Rules

Build and organize libraries of custom prompts and rules that integrate into your workflows automatically. They improve over time, adapting to your needs.

Reference File Library

Give your AI persistent access to an organized library of reference files. Use them for sourcing data or as templates for repeatable workflows.

Custom Agents

Build a team of specialists. Scouts that find information, formula wizards, domain experts. They work in parallel, speeding up progress and improving results.

Full Excel Control

Charts, PivotTables, conditional formatting, data validation, named ranges, tables, and sparklines. Every programmable action in Excel, controlled by AI.

HyperPerfect

Complex but easy to use.
